SUMMARY

Computer & Communication Engineering undergraduate at International Islamic University Chittagong (IIUC), currently in the 6th semester. Interested in web development, machine learning, and software engineering research. Builds projects in Python and JavaScript, and is working on a research project on requirement conflict detection using NLP.

EDUCATION

B.Sc. in Computer & Communication Engineering, International Islamic University Chittagong (IIUC) 2024 – 2027

Higher Secondary Certificate (HSC), Moulovi Shamsul Karim College 2022

Secondary School Certificate (SSC), Kashipur High School 2020

PROJECTS

ConflictSense – Requirement Conflict Detection (research, in progress) GitHub
Python, NLP, scikit-learn, NER

- Research project that detects and explains conflicts between requirements in Software Requirement Specification (SRS) documents.

Greenfield Smart Farming – Full-stack web app GitHub
Flask, PostgreSQL, JavaScript, Leaflet

- Farm management app with weather monitoring, fertilizer calculator, farm location map (OpenStreetMap), and analytics, built as a progressive web app.

Expense Tracker – Personal finance web app GitHub · Live demo
JavaScript, Firebase, Chart.js

- Firebase login with private per-user data, monthly and yearly spending charts, PDF and Excel export, dark mode, and an installable PWA.

Student Performance Prediction System – Machine learning GitHub
Python, Pandas, scikit-learn

- Logistic regression classifier predicting academic outcomes from attendance, class test marks, midterm marks, and previous GPA, on about 500 student records.

AI News Analyzer – Desktop application GitHub
Python, Tkinter, Transformers, NewsAPI

- Fetches live headlines, generates AI summaries, scores sentiment with VADER, and exports reports to TXT and CSV.

Face Detection System – Computer vision GitHub
Python, OpenCV, Haar Cascade

- Real-time face, eye, and smile detection from a webcam, with centroid tracking for stable face IDs and snapshot capture.

More web projects (HTML, CSS, JavaScript, with live demos on my portfolio): To-Do Pro, Life Analytics Dashboard, Nimbus Weather Dashboard, AuthVault, GitHub Profile Finder, Countdown Event Manager.

SKILLS

Languages	Python, C, C++, JavaScript (intermediate); Java (familiar)
Web	HTML5, CSS3, JavaScript, Flask; learning Django and React
Tools	Git, GitHub, VS Code, NetBeans, Eclipse
AI & Data	Machine learning, NLP, computer vision (learning and exploring)
CS fundamentals	Algorithms & data structures, database management, software engineering

CERTIFICATIONS & WORKSHOPS

- AI Agent Workshop for Non-Coders (Ostad, 1-C25940)
- Content Creation with AI Workshop (Ostad, 1-C25939)
- Cyber Security & Ethical Hacking Workshop (Ostad, 1-C25943)
- Digital Marketing Workshop for Beginners (Ostad, 1-C25945)
- Python Workshop for Beginners (Ostad, 1-C25946)
- Inter-Semester Programming Contest 2024 (participant)
- Webinar on Industry Insights and Career Talk (attendance)
- Industry Insights & Career Talk: Higher Study Abroad and Jobs, Worldwide Opportunities

LANGUAGES & INTERESTS

Languages: English, Bangla · **Interests:** travelling, learning, photography
